3D Cards

1. Cut a long rectangle of thick paper. Fold it in half lengthways, ensuring the fold is creased well.
2. Fold the top layer back to meet the middle fold. Do the same with the bottom layer to make a zig zag.
3. Open the card and draw a wavy line in pencil, pressing lightly. Start from towards the bottom of the left hand side of the page and continue in an upwards direction until you reach the top of the 3rd fold.
4. Cut along the line you have just drawn.
5. Use different coloured paper to decorate your zig zag card.
